## **ACADEMIC RESEARCH AND PROJECT EXPERIENCE**

### **DarjahAI (formerly SagyoAI) | Dec 2025 – Apr 2026 (in progress)**

Upgrading my SagyoAI prototype (basic task manager + basic chatbot with login/register) into DarjahAI; as of Jan 30, 2026 completed the new foundation (home/landing, login/register, email verification, password reset, protected dashboard/logout) and will build task CRUD (subtasks, labels/priority/status, filters, reminders), TF-IDF task analysis (similarity/themes/at-risk), an LLM chat command center with confirm-before-write actions, and Docker + PostgreSQL deployment.

SagyoAI (Dec 2025): <https://sagyoai.saadshahid.net/>

### **Personal Website (saadshahid.net) | Dec 2025 – Apr 2026 (in progress)**

Launched as a single static page in Dec 2025; as of Jan 26, 2026 refactored into a multi-page portfolio (pending deployment) and will launch GameDev/WebDev/AppDev subdomains, including a GameDev section documenting my upcoming **Unity** game **FlapperCat** (Flappy Bird-style with arrow-based pipe mechanics and multiple pipe types) plus a React WebDev section with mini web games and project showcases.

Personal Website (Dec 2025): <https://saadshahid.net>

### **Temperature Converter (C# .NET), Popeyes Terminal Adventure (Python), GifMaker (Python) | JUL, AUG, SEP 2025**

The first project provided the foundation for creating the second and third projects independently, without academic supervision, for the first time.

### **Wine Quality Classification (Python, scikit-learn) | MAY-AUG 2025 - Data Analytics - York University**

- Machine learning models to classify wine quality with feature engineering + exploratory data analysis, in which I learned skills in:  
<https://github.com/lingazoe/wine-quality-classification>

### **Information Retrieval System (Python) | Fall 2025 - Web Client Server-Systems - York University**

- This project creates a document that ranks and retrieves data. I learned how to analyze data, and this was one of my first projects with Python.  
[xxaad0/Information-Retrieval-Project](https://github.com/xxaad0/Information-Retrieval-Project)

### **D-TRACK – Web App (Node.js, SQL, JS) | Fall 2024 - Web Technologies - York University**

- This is a web application that helps users log their food intake and store recipes within a user-friendly interface. I learned the process of authentication and how to style in these languages efficiently. [xxaad0/D-Track](https://github.com/xxaad0/D-Track)

### **Frigidaire CFEF3012PWC Heat Switch Repair Tutorial | 2023 - WRIT 2201 - York University**

- This is a repair tutorial demonstrating how to use equipment to configure and fix an oven.  
<https://www.ifixit.com/Guide/Frigidaire+CFEF3012PWC+Heat+Switch+Repair/165255>
